input you should be concerned with is most. The AVR Series is equipped with sixteen data connections and eight additional connections for interfacing devices. The main data connections are the six data I/O pins (D8, D9, D10, D11, D12, D13) that will carry data from the circuit board to the AVR. The other two data connections are the programming-control pins that will connect to the programmer. The programming control pins are.

Sexually motivated crime by minors against adults. A state-wide, five-year study of sexually motivated crime by minors against adults was conducted in New York State. There was no age pattern to this type of crime. Minors of any age were involved, but the victims were generally those younger than the minors. The majority of the crimes were mutual attacks. The average age of the offenders was 16.5. The rate of molestation was highest in the 11-14 age group. These crimes appear to be in a stage of development that is

Unfortunately, the state continues to be in serious debt and relies heavily on sales taxes, property taxes and fees for services it provides. These cannot be sustained indefinitely. In fact, the state's credit rating has been downgraded several times, and a 5-percentage-point cut in corporate income tax was agreed to as part of a major financial deal last year. The state has been borrowing to balance its budget and pay for past unfunded obligations. It has borrowed \$5.4 billion this year, or about 8.8 percent of its budget. About 70 percent of that debt is guaranteed by the federal government, and another 14 percent is guaranteed by state agencies. To comply with new federal regulations, the state will have to spend more than \$28.6 billion over the next four years to fix its faulty electrical meters, making the total cost of new state regulations close to \$56 billion. "The reclassification of the water rights will have enormous implications for state coffers," says Tony Gagliardi, a research professor at Sacred Heart University's Thomas H. Kean Institute for the Study of Gambling and Commercial Gaming. "I suspect the legislature was not aware of the risks at the time. These waters are a major source of revenue for the state, not just through hydropower, but also in the form of revenues from Ditch Tax, which goes to all local governments, and the casinos, which use those revenues to pay dividends to investors and to improve the community." "We're back in the situation where New Jersey faces the prospect of raiding its rainy day fund," says Gagliardi. "Some of the early initiatives, such as higher taxes on cigarettes and fewer transfers to school districts for pension and health, are likely to pay off with a fiscal turnaround. But to be sure, the new spending plan has not yet brought the anticipated relief to the state's budget woes." [Replacement of a missing tooth by a maxillofacial prosthesis]. This article reports on the case of a 53-year-old male patient who had lost the tooth "13" in the mandible. In contrast to the physical appearance, which was very similar to that of the other teeth, the tooth appeared hollow. Based on the diagnosis of an additional tooth, which
